**FrameOne – is beauty.** FrameOne is the result of the union between high design and functionality. It reflects current trends and timeless design. FrameOne is a source of emotion, as it helps people identify with their work. And it is a source of inspiration and innovation, two key criteria for successful organisations and their employees. Find beauty in the workplace!

B0826 / B0860

Functionality as a basic feature, with high design as an added extra.

Beauty in the workplace with **FrameOne**

With its seven different tops – melamine or solid wood – and its range of colours, FrameOne is capable of a variety of tasks and is ready for all uses, from home offices to open-plan workspaces. The “suspended” TechTop desktop is particularly elegant. The available device supports provide easy solutions for all requirements.

There are many theories about form and function. These have enabled us to create FrameOne.

**Height adjustable from 62... to 90 cm**

The triangle determines the shape. The legs are continuously height adjustable from 68 to 76 cm. Alternatively, they can be adjusted in 1 cm steps with the help of a telescopic system over a desktop height ranging from 62 to 90 cm. FrameOne is always at the right height for you.

**Description of the system**

The strength of FrameOne lies in the system. For example, in the translucent accessories of the Orga rail- document boxes and supports for notepads, CDs or pencils – that offer an ideal organisation solution for the area above the workspace. Cable management in and around FrameOne is almost as invisible as the power supply – it uses a folding cable gland and cable riser with an extension or cable supports. FrameOne is environmentally friendly as a matter of course – all the structures and coatings, tops and cable guides are made of recyclable material and the wood undergoes full thermal re-treatment.
