Comfort, aesthetics and sustainable development. How far can we push the boundaries for the side chair of the future?

Today, we spend half of our working time in meetings. That's why we've designed our Think side chair to provide an **extraordinary level of comfort**, thanks to its innovative back flexor system, called "Your Profile™"

Conferencing areas play a key role in projecting a company's image. That's why we insisted on world class design for the Think side chair, working with the renowned **Glen Oliver Löw**.

Our concern was also to think forward by making the most **environmentally responsible side chair** on the market.

In fact, it's almost as if the chair could think – as if it had a **brain and a conscience**.
