Welcome! With a single glance at this brochure, experience the variety of our desk range. Pick out your favourites – in the spirit of our motto “Inspiration office”. Because you must be inspired by the desk at which you and your staff will be spending hours of valuable time. It must be as flexible as your spirit, as motivating as your success strategy and as efficient as your space-management tools. Go on an Inspiration tour!

4 Frisco The simply **intelligent** system for all unconventional things

10 Tenaro A **flexible** height and depth stacker

16 Quba II / Vitesse II Twins with **rounded** and **angular** edges

22 YoYo Deliberate **up-and-down** effect

24 Luna/Quadrino **Classically elegant** and timeless statement

26 FlipTop **No end** to its capabilities

28 Totally office The tireless **office assistant**, that makes (office) **life simpler**

Frisco I

Frisco II

We found what we were looking for right in the heart of the tomato: Frisco – **room for cool organisation!**

A comprehensive mobile system for innovative solutions, developed for flexible structures and corporate cultures.

With Frisco, a few simple movements suffice to switch from focused work to team meetings. Easy to reconfigure,

quickly convertible for various activities all day round. Self-contained and often mobile extensions turn Frisco workstations into free environments, anywhere and everywhere.

Frisco

FreeWall forms the hub of the working environment. To the right and left, everyone works individually.

Simply **intelligent**

Intelligent components

The sum of all mobile and coordinated components adds up to one harmonious whole.

Light and airy, the Frisco design is quite simply smart – as proven by its awards. Simply practical, the accessory rail, designed for workspace organisation at numerous levels. Simply well designed, centralised cable management. Accessories in dazzling bright colours that make Frisco a very trendy range of furniture. In short: Truly and simply comfortable, Frisco is unrivalled in adapting itself to all situations.

Frisco

Tasking

Teamwork

Or meetings

Frisco can be turned upside down and inside out: it never lets you down. Individual tasks, team projects, conferences, whatever. Frisco knows no boundaries.

Welcome

This is possibly your company's key workstation – it must be up to the challenge.

With FreeWall

The home base of all casual workers, who need a fully equipped office, even temporarily.

But what is so special about the Frisco system that makes it so appealing to everyone? Its sleek, stunning design? Its exceptional versatility, without detracting at all from its ergonomic design?

Or its special links with all family members who share its outlook on the world? A bit of each, the wise man would say. But the best, says Steelcase, who designed it.

A compact base providing great freedom of movement, combined with simple adjustments designed for different work heights, in addition to sophisticated cable management: all this is conducive to a perfect IT set-up. And intelligent extensions to top it all. Tenaro is modern and proud of it; economic and of high quality. A top-notch range of office furniture!

Team work, separate workstations. Nothing is easier with Tenaro. Even when work heights are different.

Tenaro

What'll you have? Which one will be yours?

C-base or T-base: with Tenaro, you're always on terra firma.

Workspace organisation ranges from simple visual privacy and to lighting, as well as built-in sideboard trays.

The brain is not the only thing at work! Bend your knees and Tenaro follows you. It's all a matter of form.

A table for multiple uses. Infinitely combinable, so it takes up little space. Whatever saves on resources frees up room for other activities – or simply for breathing space. Relaxing for your co-workers, appealing to customers and visitors. Guarantees a good work environment.

Tenaro

A team office can now be as effective and attractive as this. Full of functional workstations occupying a minimum amount of space – combined with the Orga screen or Rio. Or the attractive counter for your reception area.

Tenaro Orbit

Hold 'orbit' meetings with Tenaro!
Hold discussions, make presentations, take action.

HotDesk

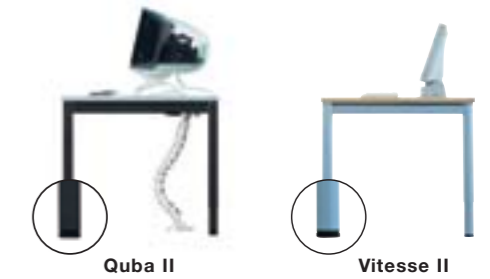

We are often perceived according to our looks. All the better for Tenaro. Its adjustable height is designed for remote visual contact, the coloured partition focuses attention right on the event. In the bulls eye.

You need them! Extensions adjacent to the table, against the table, on the table, under the table, behind the table, in front of the table. Can you name any other configurations?

HotDesk

Quba II / Vitesse II – Like building blocks

Everyone knows that there is only one small difference between Quba and Vitesse: one is square, one is round. But they are both stable and height adjustable.

Quba and Vitesse are designed like toddlers' building blocks. Scalable and inspiring, they fit right into a work environment where communication and concentration are watchwords. Timeless and infinitely versatile. At any time. From reception to meetings.

One block beckons another

That is how a coherent and solid unit is created. Have a go yourself. With multicoloured blocks from the big Steelcase family!

Quba II / Vitesse II – adapts to your growth

The same workstation can be private and focused, or open and animated.

Twinned workstations are separated by a partition with integrated lighting.

A complete office – based on the principle of modularity.

It is no longer necessary to simply “make do” when a company’s needs evolve. Take advantage of the modular principle: it was designed for that. Play around with combinations, module after module. As each one goes perfectly with the other. Really.

Work in teams or make presentations. All configurations are possible. All extensions are possible, such as the Orga partition and the Bench Quba/Vitesse for large meetings.

A large work table, modelled on the library table. Integrated access to data and electrical power networks. Steelcase know-how yet again.

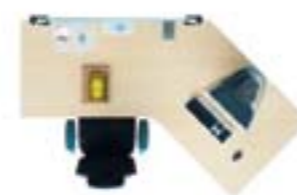

Alone or in a team All configurations are possible. All extensions are possible: for example, an Orga partition between two desks will provide visual privacy and good acoustic protection. While giving you immediate access to everything you need.

Built into a system Simple lines and functional design the Quba (square leg) and Vitesse (round leg) hallmark. Two mobile systems. Just like the accessories. Pedestal on castors, sideboard, substructure. Ideal for offices on the move.

Tops in various shapes

Numerous extensions

Compact workstations

YoYo – Fit for success

Active work for an active mind. The two go together. That's a fact. But what is being done about it? Not a whole lot. That's got to change! We are there to give your workstation a boost, thanks to stand/sit components like YoYo. A table that adjusts to suit all (work) postures. An award winner for its design...

Classical elegance – **Luna & Quadrino**

Luna is a classical range with C-legs, which produces the effect of an architectural structure: stable, sleek and simple. A contemporary design, blending into all surroundings. Easy to integrate, even without an architect...

Whether it has four legs or more, Quadrino always stands proud. What is its hallmark? Its cylindrical legs which, when needed, can extend above the workstation to accommodate a third level.

Let's meet

Almost like King Arthur's round table – magical.

Welcome

The modern cockpit for trainee and experienced pilots.

FlipTop – folds and unfolds to accommodate an infinite number of needs

Only needs a tiny parking place.

Fit together exactly.

Unfold as quickly as lightning.

Coming out of the shadows like FlipTop. First pressed against each other behind a mobile partition. A few seconds later, in the spotlight.

Stoppags. Impromptu meeting. Lack of space. Set up FlipTops, add chairs, ready to roll.

FlipTop is the catalyst of group dynamics. Available in a flash, as it mounted on castors and easy to unfold. No more excuses for delayed meetings: all connections are provided for in NetTower.

HighFlyer

Hopper

With the right equipment, mini or maxi meetings are a piece of cake to organise. HighFlyer, is a dream, not only for facility managers – easy to store, compact and with built-in connections for all types of conference. With Hopper, create a classroom atmosphere: at each desk you could hear a pin drop. Is the epitome of pure flexibility – 34 centimetres make the difference between mobile worktop extensions to bistro tables. Whatever your choice, Catering-Mobys, signposts, whiteboards or communicators are willing participants. Grand meetings to look forward to!

Summit meetings: child's play thanks to Summit.

*When work
is a pleasure
life is a joy*

The desk forms the basis. But to make a full office out of a workstation, a chair and storage facilities are also needed. As well as all those little details and great ideas that make life easier.
